

WHO WE ARE

For over 20 years, our academy has provided top-tier education in laser brow, lash treatments, and beauty training. We are dedicated to delivering exceptional training and professional products, including advanced laser equipment and diverse aesthetic solutions, to enrich our students' learning experience. We are now collaborating with Evolve Marketing, which brings over two decades of expertise in pharmaceutical sales and marketing, to extend our services and enhance accessibility to cutting-edge beauty products.

Together we are delighted to announce that we have been selected as the exclusive supplier of Derma 2.0 Medical Grade Aesthetic Products for:

South Africa and Namibia.

**ADVANCED
PRODUCTS
AND
TECHNOLOGY**

Our catalog provides a diverse range of products to enhance the quality of your clinic or practice and take it to the next level.

"In simplicity, effectiveness!"

***"Return to the essentials to rediscover
the effectiveness of active substances!"***

Derma 2.0® has long been dedicated to all professionals for years in the aesthetic and medical aesthetic field in Italy and all around the world. The commitment to the constant search for new active substances cutting-edge, meticulousness in production and post-production, the fast and efficient assistance customers service, make Derma 2.0® products perfect for all professionals who are looking for quick solutions, efficient and safe. Manufacturers and distributors of: transdermal and mesotherapy vehiculation cocktails, chemical peels and Cosmeceuticals. All Derma 2.0® products are strictly formulated and produced in complete respect for the environment, without any animal testing, free of synthetic antioxidants such as BHT and BHA, aluminium salts, SLS surfactants and aggressive SLES.

.Mesotherapy products for aesthetic purposes

Sterile, highly tolerance, no preservatives, additives or perfumes.

Pure active ingredients.

Pharmaceutical grade.

Safe.

Original mesotherapy formulas.

Products can be combined to obtain 100% customized treatments.

Proven effectiveness.

Highly concentrated.

Made in Italy.

ADVANCED TECHNOLOGY

Derma stands out from other skin boosters in the market, particularly due to its unique Meso technique. Many individuals have observed immediate results, attributing to Derma's fast-acting nature. To maintain these results, a treatment plan is essential. Precise needle placement at a 20-degree angle, inserting only 2mm of the 4mm Meso needle beneath the skin, is crucial. Look for a white papule to ensure correct placement; otherwise, results may not be optimal. Treatment plans are vital as Derma collaborates with skin cell renewal, revitalizing the ECM (extra cellular matrix).

Consider the ECM as a string of Christmas fairy lights, each representing a cell. Just like faulty bulbs affect the whole string, cell health impacts skin renewal. Hence, microneedling and Meso are combined in a single treatment to address this.

Customizing products to match individual needs is key, factoring in lifestyle, hydration, medications, and gut health. Training covers these concepts, emphasizing how cellular health influences skin rejuvenation.

Additionally, product knowledge, ingredient specifics, and their suitability for different clients and body areas are discussed. Following training, practitioners work with models to apply their learning practically. While product training may be intensive, the value it offers is unparalleled.

DERMA[®] 2.0

Derma 2.0: Protocols and Usage Guide

General Derma 2.0 cocktail tips:

Derma 2.0 cocktails can be used with all Microneedling formats, Mesotherapy and transdermal delivery methods including Electroporation, Electrophoroporation, Iontophoresis, Sonophoresis and Hydroelectrophoresis.

Note: Derma 2.0 Purifying Cocktail is not to be used with Mesotherapy or Microneedling, this is for topical or transdermal delivery methods only.

- Assess your client. Analyse how well their skin absorbs the serum you are working with. This could be 2ml, it could be 4ml, amounts depend on the area, the product being used and the desired outcome.

- The only 2 products you can mix together are Derma Firming and Derma Repair.

- No Derma 2.0 products are designed to be used on or applied to the eyelids.

- General treatment plans for Derma 2.0 cocktails is between 2 and 4 sessions for maximum results, spaced 7-10 days apart. In some cases 6 sessions are required. Note: Derma Eye treatments are spaced 2 weeks apart.

- By topping up every 6 months with just a single treatment, results can be maintained for between 9 and 12 months.

- For optimum results, we recommend always using the Derma 2.0 pre and post treatment products.

- Each individual should have a tailor-made treatment plan. Patch tests are always recommended, this is often an insurance requirement too.

Every client is different, as are their skin goals. Select the most appropriate product/s for the condition they are trying to improve or their desired outcome and design a treatment plan centred around this.

Derma 2.0 Eye: Derma Eye is a powerful draining product designed for eye bag reduction. Do not use if there are no eye bags or puffiness. When your client is upright, mark the bottom of the bag, never go above the orbital rim. Inject whichever is lower. When injecting Derma Eye go in 2mm of your 4mm mesotherapy needle at 20 degrees. Space treatments apart 2 weeks to allow for drainage and use no more than/up to 0.2ml per eye. If microneedling, use a nano head on your chosen device.

Derma 2.0 Bio: This is for all round skin glow and affectionately known as the ultimate glass facial. Derma Bio is a complete facial bio revitalisation cocktail for face, neck, décolleté and hands. It can also be used under the eye and up to the lash line to improve dark circles and fine lines and wrinkles in this area. Maximum 0.2ml per eye. Derma Bio is the perfect ally for the treatment of minor and major signs caused by chrono aging.

Derma 2.0 Firming: This product is for lifting, firming and tightening the skin on the face and body that has lost tone. Strong firming and restructuring action with a powerful cocktail based on highly concentrated active substances like DMAE and organic silicon alongside essential amino acids.

Derma 2.0 Repair: Great for any skin imperfections, stretch marks, acne scarring, scars and keloid scars. Powerful mix of active substances with a cutting-edge formulation able to correct scars (especially as a treatment for acne scars), and revascularise stretch marks, even white ones thanks to innovative active ingredients. For use on face and body.

Derma 2.0 Lifting: A true tox alternative with ingredients that block the signal to the muscle. Derma Lifting facial lifting treatment with biomimetic peptides is an effective alternative to the best known lifting anti-wrinkle techniques. It is perfect for clients who want the lifting effects of Botox without any loss of facial expression.

Derma 2.0 Whitening: The ultimate solution for pigmentation, melasma, age spots etc. Excellent for breaking down the accumulations of melanin, preventing the formation of new spots. For use on all pigmented areas of skin.

Derma 2.0 Celu: Extremely effective treatment against cellulite. For use in all areas Cellulite is commonly found. This is a powerful mix of highly concentrated functional substances with draining and anti-cellulite action.

Derma 2.0 Hydrating: Based on linear medium molecular weight high-grade, non-crosslinked Hyaluronic Acid, perfect for dehydrated skin. Contains 10mg per ml of sodium hyaluronate. It can be used on the face, neck and décolleté.

Derma 2.0 Purifying: Complete cocktail specific for oily, impure and acne-prone skin based on natural extracts with antibacterial, sebostatic, soothing and depigmenting properties. Not to be used with Mesotherapy or Microneedling, this is for topical or transdermal delivery methods only, especially as it can be used on active acne and other problematic skin conditions.

Derma 2.0 Tone Up: Discover the magic of DMAE. Derma 2.0 Tone Up targets cases of loss of tone on the face and body. DMAE in sterile vials for advanced aesthetics. DMAE is a precursor of acetylcholine, its main action is to restore tone to the tissues. For use on the face and body.

Derma 2.0 Amino-Loss: Professional monoactive Carnitine in sterile vials for advanced aesthetics with a reducing effect. Effective against hair loss, Carnitine is widely used as an additional component in the treatment of alopecia as it significantly reduces the oxidation of sebum and the consequent obstruction of the follicular ostium. For use on the face and scalp.

Derma 2.0 Peels: The standard protocol for optimal results from all Derma 2.0 peels is 5 sessions, once per week. Before using any Derma 2.0 peels, ensure the skin is perfectly cleansed and degreased with the Pre-Treatment Degreasing Solution, avoiding the eye area and mucous membranes. Always let it sit for 30 seconds. The laying time, number of applications and the layers to obtain results of all Derma 2.0 chemical peels are indicative and may vary depending on the severity of the imperfections being treated. After the Derma 2.0 peel treatment, apply two layers of Derma 2.0 Post Peeling Neutralising solution.

Derma 2.0 Creams: These are an amazing add on to treatments and highly recommended to be applied immediately after any Derma 2.0 treatment. Many of the cocktails have their associated cream to help healing and enhance results. They are also perfect to decant and supply to your client for home aftercare or to resell the bottles to clients in your clinic.

Stretch Marks and Scars

What are stretch marks & scars?

Stretch marks, similar to acne marks or scars, result from a pathological condition affecting the connective tissue in the dermis. They are characterized by localized excessive fibrosis, often triggered by skin stretching, rupture, or poor quality of pre-existing fibers.

How to reduce stretch marks?

Specially developed products can effectively reduce or remove stretch marks by working in synergy to stimulate collagen production.

TREATMENTS:

- STRETCH MARKS & SCARS
- FIRMING
- AGING

Ingredients:

Organic silicon

Box of 5 sterile vials of 10ml each

MESOTHERAPY COCKTAIL

DERMA-RESTORER SOLUTION – Organic Silicon in sterile vials

Regenerating treatment in sterile vials for aesthetics based on organic silicon Derma-Restorer solution. Derma-Restorer solution, a regenerating antioxidant treatment based on organic silicon, acts in tissues as a catalyst for various reactions. Promotes the synthesis of collagen and elastin and improves connective structures. Can be used on both face and body.

TREATMENTS:

- STRETCH MARKS & SCARS
- HYPERPIGMENTATION
- AGING

Ingredients: Vitamin A (Retinol) Box of 5 sterile vials of 5ml each

MESOTHERAPY COCKTAILS

DERMA-PRO AGE A SOLUTION – Vitamin A in sterile vials

Smoothing, illuminating and anti-aging treatment based on Vitamin A Derma Pro-Age A Solution. Vitamin A acts as an antioxidant, neutralizing the action of free radicals. Gradually smoothers wrinkles and expression lines, improving elasticity and bringing luminosity to the skin. Vitamin A also stimulates cell turnover and collagen synthesis, rejuvenating the appearance and structure of the skin. In addition to improving the appearance of stretch marks, vitamin A actively intervenes in the natural self-soothing processes of the skin, especially following acne manifestations.

TREATMENTS

- STRETCH MARKS & SCARS -
AGING

Ingredients: Hydrolyzed collagen
Box of 5 sterile vials of 5ml each

MESOTHERAPY COCKTAILS

DERMA-NO TIME SOLUTION – Hydrolyzed collagen in sterile vials

The properties of hydrolyzed collagen make it ideal for regenerating treatments for both the face and body. It not only stimulates collagen synthesis but also the activity of fibroblasts. It helps prevent skin aging, improves the appearance of stretch marks, scars and strengthens hair follicles.

AESTHETIC DEVICE

Derma-Active® – Professional electroporator for face and body transdermal delivery treatments

The device allows you to carry out entirely personalized electroporation and bio-dynamic electrostimulation treatments, revitalizing the tissue through the use of Bio- modulated Frequencies.

The operator will be able to select up to 11 work programs that can be adapted to both the face and body, and can improve any type of blemish in any anatomical area.

With transdermal delivery combined with the Derma 2.0 cocktails it is possible to act on practically all imperfections in every part of the body such as: wrinkles and expression lines, loss of tone on the face, neck and décolleté, bags and dark circles, acne, spots, localized fat deposits, cellulite and water retention with surprising results!

The device has a total weight of 7.5 kg and measures 37 x 37 x 22cm and is easy to transport.

Italian CE certification in compliance with all the relevant directives:

CHEMICAL PEELS, PROFESSIONAL SKINCARE

DERMA SUN – Post treatment SPF50+ Sunscreen

Specific post treatment Sunscreen/Sun Protection SPF50+ post laser treatment, needling and peeling protects against UVA and UVB rays following aesthetic and medical aesthetic treatments such as chemical peels (Glycolic acid, Derma Purifying Peeling, Derma Whitening Peeling, Derma Hydrating Peeling), needling, laser, mesotherapy and transdermal mesotherapy. Apply generously in the days after any kind of treatment. 50ml airless Tube.

Derma-Sun SPF50+ post treatment Sunscreen / Sun protection contains active ingredients such as:

- Panthenol (vitamin B5): has emollient, moisturizing, de-redness and soothing properties; Tetrapeptide-14: soothing and anti-reddening peptide; Aloe vera gel: with soothing and anti-inflammatory effect; Rooibos Extract (Red Tea): with anti-aging, de-redness and sanitizing properties; Green Tea extracted: it has skin-purifying and astringent properties; Boswellia Serrata (incense): has anti-reddening and stimulating properties of the fibroblast; Honey extracted: natural antiseptic and anti-inflammatory.

MESOTHERAPY COCKTAILS

DERMA REPAIR® – Complete stretch marks and scar treatment

Powerful mix of active substances with a cutting-edge formulation able to correct scars (especially as a treatment for acne scars), and revascularize stretch marks, even white ones thanks to an innovative active ingredient (PSEUDOALTEROMONAS extract) and to the synergy of a patented peptide complex (in particular Acetyl Tripeptide- 30, Pentapeptide-18), amino acids (L-Arginine, L-Proline, Glycine, Citrulline) wisely combined with a high concentration of D-Panthenol and Centella asiatica extract.

To obtain maximum result the professional will use once a week over the affected area the Glycolic acid Peeling

CHEMICAL PEELS

POST-TREATMENT SHOOTING & CALMING MASK

Post treatment shooting and calming sensitive skin face mask – The active ingredient contained in the soothing calming post treatment face mask act in synergy to soothe, decongest and re-epithelialize in the safest, fastest and most effective way the skins previously subjected to peeling treatment (such as the Glycolic acid, the Derma Purifying Peeling, the Derma Whitening Peeling and the Derma Hydrating Peeling), needling and laser treatments. Apply immediately post needling, peeling, laser treatment and/or twice daily for a week after treatment.

50ml airless Tube.

Ingredients: -Aloe vera (* from organic farming) -Tetrapeptide-14 -Rooibos - Green tea extract -Polyphenols - Boswellia serrata extract -Honey extract

CHEMICAL PEELS

POST-PEEL NEUTRALISING SOLUTION

Post-Peel Neutralising solution with alkaline Ph is necessary for the deactivation of chemical peels that need to be stopped during the procedure or in the rinsing phase. Among the peels that need neutralisation, we find: Glycolic acid, the Derma Purifying Peel, the Derma Whitening Peel and the Derma Hydrating Peel.

100ml Spray Bottle.

TREATMENTS

- STRETCH MARKS & SCARS
- HYPERPIGMENTATION
- HYDRATING
- FIRMING
- AGING
- ACNE

CHEMICAL PEELS

PRE-TREATMENT DEGREASING SOLUTION

Pre-treatment Degreasing solution – Preparatory solution essential to acidify the skin pH before a chemical exfoliation treatment (pre-peeling and pre-needling), in order to make possible (as well as optimal and uniform) the penetration and action of the chosen chemical peeling or the preparation of the skin for any aesthetic treatment (peeling, needling, dermabrasion etc ...). Applied with a well soaked gauze, the degreasing solution eliminates the hydrolipidic layer by balancing and acidifying the skin's pH.

TREATMENTS

Localised Fat

What is Subcutaneous Fat? Subcutaneous fat serves as an energy reserve, providing over twice the energy produced by proteins and carbohydrates. Additionally, it acts as insulation against the cold and provides support for various organs, shielding them. However, when it accumulates excessively in specific areas of the body, it can become visually unappealing.

TREATMENTS

- LOCALIZED FAT
- CELLULITE
- ALOPECIA

Ingredients
Caffeine

MESOTHERAPY COCKTAILS

DERMA-DRAIN UP SOLUTION – Caffeine in sterile vials

Caffeine-based draining treatment in sterile vials Derma- Drain Up Solution. Caffeine is used in lipolytic and anti- cellulite treatments. It works by decreasing the accumulation of fat in adipocytes and stimulating microcirculation. Draining and thermogenic effect.

5 sterile vials of 10ml each

TREATMENTS

- LOCALIZED FAT
- CELLULITE
- ALOPECIA

MESOTHERAPY COCKTAILS

DERMA-AMINO LOSS SOLUTION – Carnitine in sterile vials

Monoactive for exclusive professional use based on Carnitine. The specific action of L-Carnitine is to transport fatty acids across the mitochondrial membrane where they are transformed into energy. It is widely used for treatments with a reducing action and to improve the condition of the hair bulbs in the treatment of alopecia.

5 sterile vials of 10ml each

Ingredients:
Carnitine

TREATMENTS

- LOCALIZED FAT

Ingredients: Deoxycholic acid (Sodium deoxycholate)

MESOTHERAPY COCKTAILS

DERMA-SLIM UP SOLUTION – Deoxycholic acid in sterile vials

Professional monoactive based on deoxycholic acid in vials for advanced aesthetics. It facilitates the dissolution of membranes with a very high lipid content, such as adipocytes and their vacuoles. It is used for the treatment of localized fat deposits with or without cellulite and in the aesthetic reduction of double chin.

5 sterile vials of 10ml each

TREATMENTS

-LOCALIZED FAT

Ingredients:
Phosphatidylcholine +
deoxycholic acid

MESOTHERAPY COCKTAILS

DERMA-REMODELING SOLUTION – Phosphatidylcholine + deoxycholic acid in sterile vials

Remodeling treatment with phosphatidylcholine and deoxycholic acid with a reducing and lipolytic effect Derma-Remolding Solution. Vials for remodeling treatment with lipolytic effect based on highly concentrated phosphatidylcholine and deoxycholic acid. It solubilizes fats and reduces the volume of adipocytes.

5 sterile vials of 10ml each

AESTHETIC DEVICE

Derma-Active® – Professional electroporator for face and body transdermal delivery treatments

The device allows you to carry out entirely personalized electroporation and bio-dynamic electrostimulation treatments, revitalizing the tissue through the use of Biomodulated Frequencies.

The operator will be able to select up to 11 work programs that can be adapted to both the face and body, and can improve any type of blemish in any anatomical area.

With transdermal delivery combined with the Derma 2.0 cocktails it is possible to act on practically all imperfections in every part of the body such as: wrinkles and expression lines, loss of tone on the face, neck and décolleté, bags and dark circles, acne, spots, localized fat deposits, cellulite and water retention with surprising results!

The device has a total weight of 7.5 kg and measures 37 x 37 x 22cm and is easy to transport.

Phosphatidylcholine, Aescin, Caffeine, Tripeptide-1, Pineapple extract, Ivy extract, Ruscus extract, Ginkgo biloba, Sweet almond oil, Illipè butter, Vitamin E, Aloe vera.

PROFESSIONAL SKINCARE

DERMA LIPO – Body slimming phosphatidylcholine cream

Slimming body phosphatidylcholine cream for localized adiposity and fat pads treatment based on Phosphatidylcholine, Aescin, Caffeine, Tripeptide-1, Pineapple extract, Ivy extract, Ruscus extract, Ginkgo biloba, Sweet almond oil, Illipè butter, Vitamin E, Aloe vera (from organic farming) for a smoothing and toning slimming effect. Intensive remodeling treatment to counteract the fat masses located in the various critical points of the body. It takes advantage of the remodeling properties that conveyed phosphatidylcholine is known for. This specific formulation uses the best of nature and cosmetic technology to remodel the imperfections due to adipose masses.

200ml Airless Tube

MESOTHERAPY COCKTAILS

DERMA LIPO® – Complete Lipolytic and fat reducing treatment

A synergy of active ingredients with lipolytic and remodelling effect, adjuvant in the treatment of localized adiposity. It quickly improves the appearance of areas of the body that have fatty deposits and irregularities of texture, also acting on "orange peel skin".

Phosphatidylcholine works by solubilizing fats and thus reducing the volume of adipocytes that contain them. Sodium deoxycholate degrades the adipocyte membranes favouring their destruction while carnitine breaks down fats converting them into energy. Caffeine effectively stimulates microcirculation by promoting drainage while bilberry extracts and Sh-Oligopeptide 2 reduce damage from free radicals.

TREATMENTS

-LOCALIZED FAT

Ingredients: Phosphatidylcholine 7%, Sodium Deoxycholate 3%, Carnitine, Caffeine, Bilberry Extract, Seed Extract of Arabian coffee, Sh-Oligopeptide 2

To obtain maximum result at home, use twice a day (morning and night) the Reducing, Lipolytic and slimming body Cream Derma Lipo on dry skin

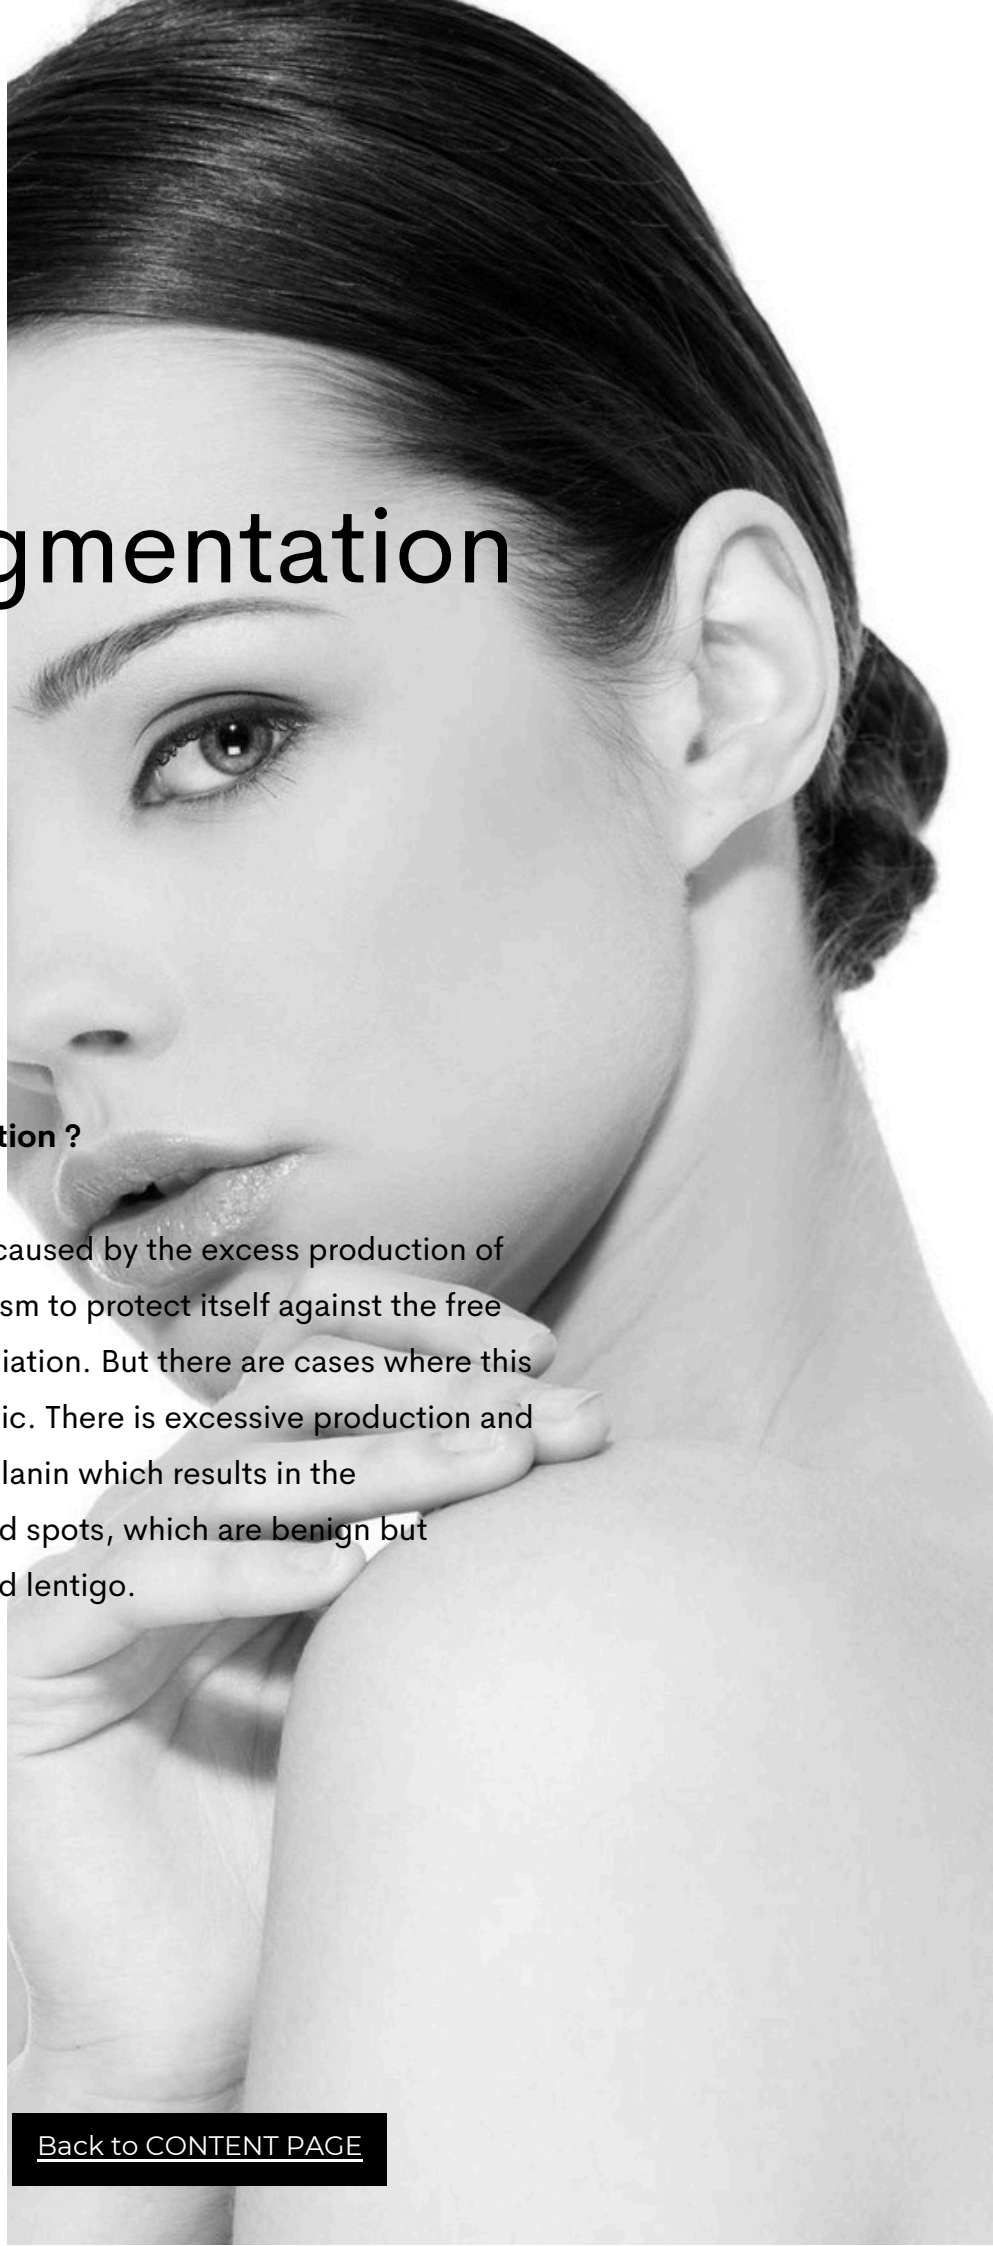

Hyperpigmentation

What cause Hyperpigmentation ?

The pigmentation of the skin, caused by the excess production of melanin, is a defence mechanism to protect itself against the free radicals produced by solar radiation. But there are cases where this pigmentation becomes anarchic. There is excessive production and irregular distribution of the melanin which results in the appearance of hyperpigmented spots, which are benign but unsightly, such as melasma and lentigo.

CHEMICAL PEELS

PRE-TREATMENT DEGREASING SOLUTION

Pre-treatment Degreasing solution – Preparatory solution essential to acidify the skin pH before a chemical exfoliation treatment (pre-peeling and pre- needling), in order to make possible (as well as optimal and uniform) the penetration and action of the chosen chemical peeling or the preparation of the skin for any aesthetic treatment (peeling, needling, dermabrasion etc ...). Applied with a well soaked gauze, the degreasing solution eliminates the hydrolipidic layer by balancing and acidifying the skin's pH.

30ml Dropper bottle with pipette.

TREATMENTS

- HYPERPIGMENTATION

CHEMICAL PEELS

DERMA WHITENING PEELING

Depigmenting and anti-dark spot action Chemical Peeling active on hyperpigmentation such as senile lentigo, solar lentigo, melasma and chloasma. Based on glycolic acid, resorcinol, kojic acid, azelaic acid, arbutin and lactobionic acid. It works effectively by breaking down the accumulations of melanin and inhibiting its over-production. Suitable for all skin types.

50ml Dropper bottle with pipette.

Ingredients: Glycolic acid, Resorcinol, Kojic acid, Azelaic acid, Arbutin and Lactobionic acid

MESOTHERAPY COCKTAILS

DERMA WHITENING® – Complete depigmenting, dark spot and whitening treatment for face

TREATMENTS

-HYPERPIGMENTATION

Ingredients:

Resorcinol, Arbutin, Succinic acid, Azelaic acid, C vitamin, Glutathione, Sh-Oligopeptide-1, Sh-Oligopeptide-2, Polypeptide-1, Polypeptide-9, Polypeptide-11

Complete treatment depigmenting action treatment active against hyperpigmentation such as dark spots, senile lentigo, solar lentigo, melasma, and Photo- Aging. This powerful mix of active ingredients acts by inhibiting melanogenesis and breaking down the accumulations of melanin, preventing the formation of new spots. The special complex of biomimetic peptides makes it an optimal solution to counteract the damage induced by Photo-Aging.

Hydrating

Dry skin indicates a lack of hydration, resulting in dryness, itchiness, and potentially a dull appearance. Uneven tone, complexion, and more visible fine lines may also be signs of dehydrated skin. Although it can be bothersome, addressing dehydrated skin is manageable with appropriate lifestyle adjustments and high-quality hydrating skincare products.

TREATMENTS

Ingredients:

Cordyceps Sinensis Extract,
Trametes Versicolor Extract,
Lavender extract, Mallow extract,
Aloe Vera, Bisabolol, Allantoin,
Acetyl decapeptide-3, Hyaluronic
acid

The device has a total weight of 7.5 kg and measures 37 x 37 x 22cm and is easy to transport.

Italian CE certification in compliance with all the relevant directives:

MESOTHERAPY COCKTAILS

DERMA-SENSITIVE® – Complete cocktail for sensitive, reactive and rosacea prone skin

Complete cocktail specific for sensitive, reactive and couperose skin based on natural extracts with soothing, anti-reddening, calming and repairing properties such as: Mallow extract, Lavender, Aloe Vera, Cordyceps Sinensis, Trametes Versicolor, Bisabolol, Allantoin, Hyaluronic acid and Acetyl decapeptide-3. A precious ally in the professional treatment through transdermal delivery techniques (electroporation) of hyper-reactive, red, dry and rosacea skin.

To obtain maximum result, after all treatment, the professional will use the Post treatment soothing mask Derma-Regen.

AESTHETIC DEVICE

Derma-Active® – Professional electroporator for face and body transdermal delivery treatments

The device allows you to carry out entirely personalized electroporation and bio-dynamic electrostimulation treatments, revitalizing the tissue through the use of Biomodulated Frequencies.

The operator will be able to select up to 11 work programs that can be adapted to both the face and body, and can improve any type of blemish in any anatomical area.

With transdermal delivery combined with the Derma 2.0 cocktails it is possible to act on practically all imperfections in every part of the body such as: wrinkles and expression lines, loss of tone on the face, neck and décolleté, bags and dark circles, acne, spots, localized fat deposits, cellulite and water retention with surprising results!

CHEMICAL PEELS, PROFESSIONAL SKINCARE

DERMA SUN – Post treatment SPF50+ Sunscreen

Specific post treatment Sunscreen/Sun Protection SPF50+ post laser treatment, needling and peeling protects against UVA and UVB rays following aesthetic and medical aesthetic treatments such as chemical peels (Glycolic acid, Derma Purifying Peeling, Derma Whitening Peeling, Derma Hydrating Peeling), needling, laser, mesotherapy and transdermal mesotherapy. Apply generously in the days after any kind of treatment. 50ml airless Tube.

Ingredients:

Panthenol (vitamin B5): has emollient, moisturizing, de-redness and soothing properties;
 Tetrapeptide-14: soothing and anti-reddening peptide; Aloe vera gel: with soothing and anti-inflammatory effect
 Rooibos Extract (Red Tea): with anti-aging, de-redness and sanitizing properties
 Green Tea extracted: it has skin-purifying and astringent properties;
 Boswellia Serrata (incense): has anti-reddening and stimulating properties of the fibroblast
 Honey extracted: natural antiseptic and anti-inflammatory.

Combined chemical peeling with rehydrating action, stimulating cell turnover and illuminating. Indicated as an adjunct in the treatment of dry skin and senescent. Based on Lactic acid, citric acid, malic acid, gluconolactone, arginine, lactobionic acid, threonine, carnitine, ferulic acid, thiotic acid. Suitable for all skin types.

50ml dropper bottle with pipette. Ingredients:

Lactic acid, citric acid, malic acid, gluconolactone, arginine, lactobionic acid, threonine, carnitine, ferulic acid, thiotic acid.

TREATMENT

- HYDRATING

MESOTHERAPY COCKTAILS

DERMA HYDRATING® – Complete hydrating treatment

Moisturizing treatment with linear medium molecular weight hyaluronic acid. Hyaluronic acid allows you to maintain the correct percentage of water needed to "reactivate" all metabolic processes as well as significantly reduce the excessive trans-epidermal evaporation of water while maintaining elastic and toned tissues. It can be used on the face, neck and décolleté during all day in the year as it is not photosensitizing. Ideal for dry, dehydrated and senescent skin.

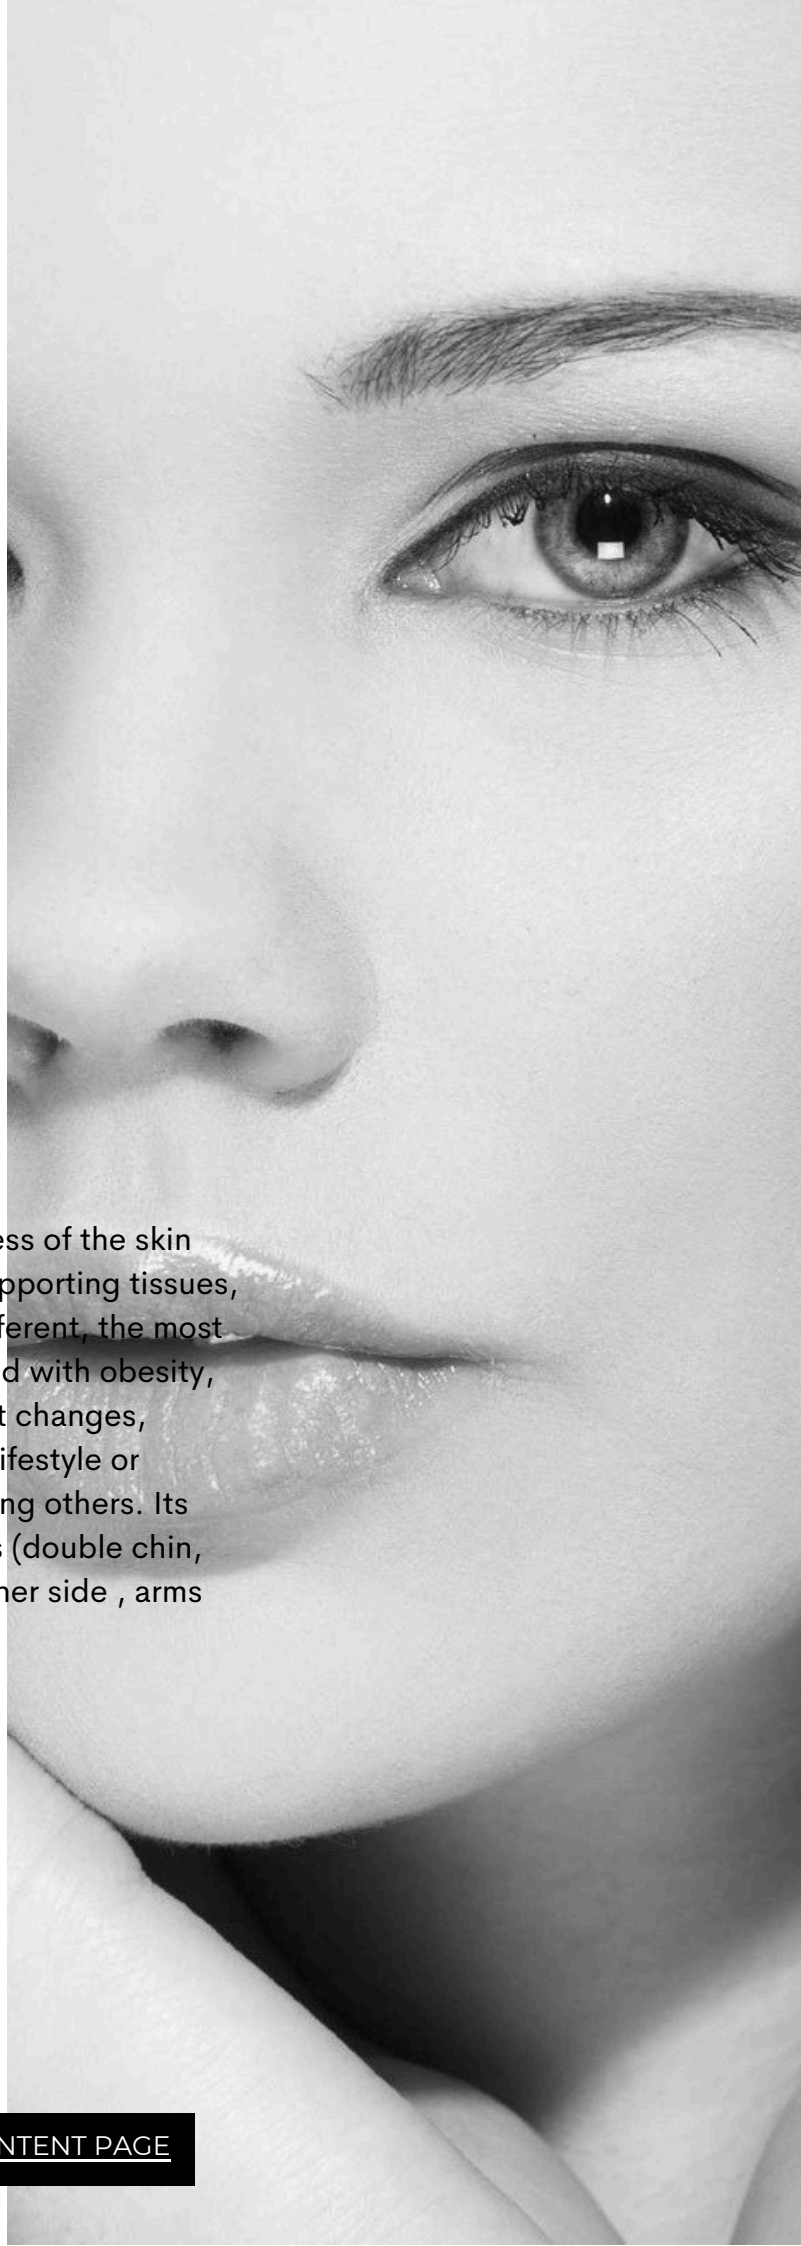

TREATMENT -HYDRATING

Ingredients: 1% Linear Medium Molecular Weight Hyaluronic Acid (not cross-linked)

Firming

Flaccidity is the loss of tone and firmness of the skin due to the decrease or weakness of supporting tissues, collagen and elastin. Its causes are different, the most frequent is aging. Others are associated with obesity, sudden weight loss or repeated weight changes, pregnancy, lack of protein, sedentary lifestyle or exaggerated exposure to the sun, among others. Its most frequent locations are: face areas (double chin, mandibular angle or eyelids), thighs inner side, arms inner side, abdomen and buttocks.

Dark Circles & Bags

What are Dark circles and Eye bags ? Dark circles consist in a localized discoloration in the eye contour and may depend on various factors: skin pigmentation, epidermal thickness (which, if thin, reveals the capillaries and underlying vessels) and, decisively, also genetics. Eye bags constitute the classic swelling in the lower part of the eye contour and are essentially caused by adipose tissue and water retention. Again, genetics are decisive. How to prevent Eye related inestetism? Eye bags and dark circles can be prevent by using focused products based on these specifics inestetism. Derma 2.0 offer the best anti Dark Eye and anti Eye bags products on market: Safe, ISO Certified and 100% Made in Italy.

DERMA CELU® – Complete draining and anti-cellulite treatment

Powerful mix of highly concentrated functional substances with draining and anti-cellulite action. A special Pgc-1 protein modulator complex (which regulates the increase in blood glucose levels by activating the oxidation processes of fatty acids and gluconeogenesis in the liver) together with 20% carnitine, caffeine, centella asiatica, extracts of pineapple, horsetail, artichoke, ruscus, promotes lipolysis by draining excess fluids and significantly improving cellulite at all stages.

Alopecia

Alopecia areata is a disease that causes sudden hair loss in patches in one or more localized areas of the scalp. These lesions appear rounded, well demarcated and completely hairless. At the edges of these areas, the hair is short and broken. The cause of alopecia areata is still unknown, but the origin is believed to be autoimmune, so it is likely that a (still unknown) trigger erroneously triggers an immune reaction against the hair follicle, preventing it from producing hair. In practice, the anagen phase, i.e. hair growth, is abruptly interrupted. Alopecia areata tends to occur following severe stress conditions. Furthermore, it has been found that alopecia areata affects individuals who are genetically predisposed and susceptible to triggering factors that are not yet fully known, such as infections, endocrine dysfunction and malnutrition.

5 sterile vials of 5ml each

Ingredients: Vitamins B1 (Thiamine), B3 (Niacinamide), B6 (Pyridoxine), B12 (Cyanocobalamin)

Aging

What is aging? Aging of the skin, known as cutaneous aging, occurs due to a variety of factors such as age, exposure to ultraviolet light, and smoking. This process is characterized by the emergence of wrinkles, skin discoloration (both lightening and darkening), dryness, visible small blood vessels near the skin's surface (telangiectasia), skin atrophy, uneven thinning of the skin, loss of elasticity, creases, age spots, and other signs.

How to prevent aging? To combat aging, using targeted products tailored to specific age-related skin issues is crucial. Derma 2.0 offers top-notch anti-aging products on the market: they are safe, ISO certified, and proudly made in Italy.

Box of 5 sterile vials of 10ml each

TREATMENTS:

- STRETCH MARKS & SCARS
- HYPERPIGMENTATION
- AGING

Ingredients:

Vitamin A (Retinol)

Box of 5 sterile vials of 5ml each

TREATMENTS

- HYPERPIGMENTATION
- AGING

Ingredients:

Ascorbic acid (Vitamin C)

MESOTHERAPY COCKTAIL

DERMA-RESTORER SOLUTION – Organic Silicon in sterile vials

Regenerating treatment in sterile vials for aesthetics based on organic silicon Derma- Restorer solution. Derma-Restorer solution, a regenerating antioxidant treatment based on organic silicon, acts in tissues as a catalyst for various reactions. Promotes the synthesis of collagen and elastin and improves connective structures. Can be used on both face and body.

MESOTHERAPY COCKTAILS

DERMA-PRO AGE A SOLUTION – Vitamin A in sterile vials

Smoothing, illuminating and anti-aging treatment based on Vitamin A Derma Pro-Age A Solution. Vitamin A acts as an antioxidant, neutralizing the action of free radicals. Gradually smoothes wrinkles and expression lines, improving elasticity and bringing luminosity to the skin. Vitamin A also stimulates cell turnover and collagen synthesis, rejuvenating the appearance and structure of the skin. In addition to improving the appearance of stretch marks, vitamin A actively intervenes in the natural self-soothing processes of the skin, especially following acne manifestations.

MESOTHERAPY COCKTAILS

DERMA-RADIANT C SOLUTION – Vitamin C in sterile vials

Illuminating facial treatment based on Vitamin C in sterile vials. Vitamin C (or ascorbic acid) is a very effective antioxidant that neutralizes the harmful effects of free radicals. Regulates melanin synthesis and increases collagen synthesis. Mainly used to treat and prevent photoaging, skin irregularities and wrinkles.

5 sterile vials of 5ml each

TREATMENTS

- FIRMING
- AGING

Ingredients:

DMAE (dimethylaminoethanol)

MESOTHERAPY COCKTAILS

DERMA-TONE UP SOLUTION – Monoactive DMAE in sterile vials

DMAE in sterile vials for advanced aesthetics or dimethylaminoethanol used in cases of loss of tone on the face and body. As a precursor of acetylcholine, its main action is to restore toneness to the tissues.

DMAE also has strong anti-free radical properties. It can be used alone or combined with other functional substances for toning and firming treatments on the face and body.

5 sterile vials of 10ml each

Ingredients:

Hydrolyzed collagen

Box of 5 sterile vials of 5ml each

MESOTHERAPY COCKTAILS

DERMA-NO TIME SOLUTION – Hydrolyzed collagen in sterile vials

The properties of hydrolyzed collagen make it ideal for regenerating treatments for both the face and body. It not only stimulates collagen synthesis but also the activity of fibroblasts. It helps prevent skin aging, improves the appearance of stretch marks, scars and strengthens hair follicles.

TREATMENTS

- HYDRATING
- AGING

Ingredients:

Cordyceps Sinensis Extract,
 Trametes Versicolor Extract,
 Lavender extract, Mallow extract,
 Aloe Vera, Bisabolol, Allantoin,
 Acetyl decapeptide-3, Hyaluronic
 acid

The device has a total weight of 7.5 kg and measures 37 x 37 x 22cm and is easy to transport.

Italian CE certification in compliance with all the relevant directives.

MESOTHERAPY COCKTAILS

DERMA-SENSITIVE® – Complete cocktail for sensitive, reactive and rosacea prone skin

Complete cocktail specific for sensitive, reactive and couperose skin based on natural extracts with soothing, anti-reddening, calming and repairing properties such as: Mallow extract, Lavender, Aloe Vera, Cordyceps Sinensis, Trametes Versicolor, Bisabolol, Allantoin, Hyaluronic acid and Acetyl decapeptide-3. A precious ally in the professional treatment through transdermal delivery techniques (electroporation) of hyper-reactive, red, dry and rosacea skin.

To obtain maximum result, after all treatment, the professional will use the Post treatment soothing mask Derma-Regen.

AESTHETIC DEVICE

Derma-Active® – Professional electroporator for face and body transdermal delivery treatments

The device allows you to carry out entirely personalized electroporation and bio-dynamic electrostimulation treatments, revitalizing the tissue through the use of Biomodulated Frequencies.

The operator will be able to select up to 11 work programs that can be adapted to both the face and body, and can improve any type of blemish in any anatomical area.

With transdermal delivery combined with the Derma 2.0 cocktails it is possible to act on practically all imperfections in every part of the body such as: wrinkles and expression lines, loss of tone on the face, neck and décolleté, bags and dark circles, acne, spots, localized fat deposits, cellulite and water retention with surprising results!

CHEMICAL PEELS, PROFESSIONAL SKINCARE

DERMA SUN – Post treatment SPF50+ Sunscreen

Specific post treatment Sunscreen/Sun Protection SPF50+ post laser treatment, needling and peeling protects against UVA and UVB rays following aesthetic and medical aesthetic treatments such as chemical peels (Glycolic acid, Derma Purifying Peeling, Derma Whitening Peeling, Derma Hydrating Peeling), needling, laser, mesotherapy and transdermal mesotherapy. Apply generously in the days after any kind of treatment. 50ml airless Tube.

Ingredients:

TREATMENTS

- STRETCH MARKS & SCARS
- HYPERPIGMENTATION
- HYDRATING
- FIRMING
- AGING
- ACNE

Ingredients:

- Panthenol (vitamin B5): has emollient, moisturizing, de-redness and soothing properties
- Tetrapeptide-14: soothing and anti-reddening peptide
- Aloe vera gel: with soothing and anti-inflammatory effect
- Rooibos Extract (Red Tea): with anti-aging, de-redness and sanitizing properties
- Green Tea extracted: it has skin-purifying and astringent properties
- Boswellia Serrata (incense): has anti-reddening and stimulating properties of the fibroblast
- Honey extracted: natural antiseptic and anti-inflammatory.

TREATMENT

- AGING

Ingredients: lactic acid, mandelic acid, salicylic acid, serine, glycine, proline, rice oil, rose muscat oil, pollen extract, soy extract, olive oil, wheat germ oil, argan oil

CHEMICAL PEELS

DERMA BIO PEELING – Complete biorevitalizing peeling

Combined bi-fasic chemical peeling with biorevitalizing proprieties which act as 360° on all sign of premature and consolidated skin aging. Stimulate collagen production, uniform the texture, rehydrate and tone the skin.

Based on lactic acid, mandelic acid, salicylic acid, serine, glycine, proline, rice oil, rose muscat oil, pollen extract, soy extract, olive oil, wheat germ oil, argan oil. Suitable for all skin types.

Box of 5 x 5ml Vials.

TREATMENT

FILLERS

Derma Fill® – Reticulated Hyaluronic acid filler for Hyaluron pen

Hyaluronic acid for Hyaluron Pen cross-linked with BDDE 21 mg / ml MADE in ITALY in 1ml pre-filled syringe without needles with Luer-Lock connector.

Highly purified, pyrogenic and safe sterile gel based on Cross-linked Hyaluronic Acid in a concentration of 21 mg / ml for filling lips and deep wrinkles with transdermal delivery devices such as Hyaluron Pen. Its molecular size and viscosity make it an extremely moldable and resistant filler (estimated duration varies from person to person 4-6 months) at the same time 100% resorbable and safe.

TREATMENT

-AGING

MESOTHERAPY COCKTAILS

DERMA LIFTING® – A complete facial lifting treatment infused with peptides.

This comprehensive lifting treatment features a potent cocktail containing highly concentrated active ingredients such as Argireline 5% (acetyl hexapeptide-8) and Leuphasyl (pentapeptide-18) 5%, which mimic the effects of Botox by significantly reducing the contraction of the muscles that lead to dynamic wrinkle formation.

Ingredients: Argireline (5%),
Leuphasyl (5%), Hyaluronic acid.

For optimal results, it is recommended to use the biorivitalizing anti-wrinkle Derma-Bio Cream twice a day at home after cleansing with either the Derma Hydrating or Derma Purifying Mousse on dry skin.

Ingredients: Rosa centifolia, aloe vera, panax ginseng, calendula extract, hyaluronic acid, gluconolactone, rosa mosqueta, lactic acid.

PROFESSIONAL SKINCARE

DERMA HYDRATING MOUSSE – Hydrating cleansing mousse

Hydrating Foam Facial Cleansing Mousse for the daily hygiene of dry and dehydrated skin. Its formula based on hyaluronic acid, aloe vera, rosa centifolia, rosa mosqueta, calendula and gluconolactone gives a deep and immediate hydration while respecting the normal epidermal balance. Suitable for both face and body cleansing. To obtain a UNIQUE Moisturizing effect, proceed as follows:

Cleanse the skin with the Derma-Hydrating cleansing mousse, pat dry (without rubbing), apply the Derma Hydrating Cream D 2.0® face cream in the MORNING AND EVENING massaging until completely absorbed. 1/2 times a week: cleanse your face, massage the Derma-Scrub Face on damp skin for about 20-30 seconds and rinse thoroughly with water. Pat dry and then apply by massaging the Derma Hydrating Cream D 2.0® face cream

150ml Airless bottle

CHEMICAL PEELS

POST-TREATMENT SOOTHING & CALMING MASK

Post treatment soothing and calming sensitive skin face mask – The active ingredient contained in the soothing calming post treatment face mask act in synergy to soothe, decongest and re-epithelialize in the safest, fastest and most effective way the skins previously subjected to peeling treatment (such as the Glycolic acid, the Derma Purifying Peeling, the Derma Whitening Peeling and the Derma Hydrating Peeling), needling and laser treatments. Apply immediately post needling, peeling, laser treatment and/or twice daily for a week after treatment.

50ml airless Tube.

Ingredients: -Aloe vera (* from organic farming) -Tetrapeptide-14 -Rooibos - Green tea extract -Polyphenols - Boswellia serrata extract -Honey extract

MESOTHERAPY COCKTAILS

DERMA-BIO® – Complete biorevitalizing treatment

TREATMENT

- AGING

Ingredients

3 different molecules of hyaluronic acid with 3 different molecular weights (high, medium, low), Vitamin A, Vitamin E, Vitamins B (B1, B3, B6, B8), Vitamin C, Amino acids (Glycine, L-Proline, L-hydroxyproline, L-Arginine), Dmae, Argireline, Sodium Dna, Glutathione

A revolutionary biorevitalizing treatment formulated to be active on all signs of age and act on any sign of time. Thanks to the innovative complex of 3 different molecular weights of hyaluronic acid (Low, medium and high), vitamin A, vitamin B, vitamin C and E, as well amino acids, DMAE, peptides, sodium DNA and antioxidants act in synergy to give more hydration, homogeneity of texture, elasticity and tone. After just 4 weeks, there is a considerable improvement in general state of the skin and a brighter, relaxed and visibly more uniform appearance.

Acne

What is Acne ?

Acne is a skin disorder which involves the pilosebaceous units and is characterized by the formation of comedones (blackheads and whiteheads), papules (pimples), pustules (spots containing pus) and sometimes even nodules and cysts (deep spots), which appear mainly on the face and upper part of the trunk, although they are also localized in glutes and thighs.

What cause Acne?

Acne occurs as a result of several factors: an alteration in the keratinisation of the hair follicle, an overproduction of sebum and the bacterial overgrowth of a micro-organism called *propionibacterium acnes*, among other causes.

TREATMENTS

- ACNE

Ingredients: Burdock extract, Vitamin A palmitate, Azelogylicine, Azelamidopropyl Dimethyl Amine, Cordyceps Sinensis extract, Trametes Versicolor extract, Niacinamide, Oligopeptide-34

MESOTHERAPY COCKTAILS

DERMA-PURIFYING® – Complete cocktail for impure and acne- prone skin

Complete cocktail specific for oily, impure and acne- prone skin based on natural extracts with antibacterial, sebostatic, soothing and depigmenting properties such as: Burdock extract, Vitamin A palmitate, Oligopeptide- 34, Azelogylicine, Niacinamide, Conrdyceps Sinensis, Trametes Versicolor and Azelamidopropyl Dimethyl Amine. A valid ally in the professional treatment through transdermal delivery techniques (electroporation) of hypersoborrheic and acneic skin with a dermopurifying action.

AESTHETIC DEVICE

Derma-Active® – Professional electroporator for face and body transdermal delivery treatments

The device has a total weight of 7.5 kg and measures 37 x 37 x 22cm and is easy to transport.

Italian CE certification in compliance with all the relevant directives:

The device allows you to carry out entirely personalized electroporation and bio-dynamic electrostimulation treatments, revitalizing the tissue through the use of Biomodulated Frequencies.

DERMA - ACTIVE® : BIO - DYNAMIC FREQUENCY ELECTROPORATOR

Derma-Active® is the first professional aesthetic electroporator 100% Made in Italy which allows you to carry out treatments entirely personalized, electroporation and bio-dynamic electrostimulation, revitalizing the tissue through the use of biomodulated frequencies.

The operator can select up to 11 work programs adaptable to both face and body, combinable with each other, with specifically calibrated powers and frequencies designed to improve any type of blemish in any anatomical area.

With transdermal delivery combined with biostimulation at biomodulated frequencies and using the complete Derma 2.0® cocktails, it is possible to act on all blemishes such as: wrinkles and expression lines, loss of tone on the face, neck and décolleté, bags and dark circles, acne, spots, localized fat, cellulite and water retention with surprising results from the first session.

Derma-Active® allows you to carry out treatments of:

- Electroporation: through non-invasive and painless electrical stimuli it is able to increase membrane permeability, in order to convey functional substances chosen according to the imperfection to be treated
- Bio-dynamic electrostimulation: through non-invasive and painless electrical impulses that allow the start of specific tasks to the target cells (for example the stimulation of the fibroblast to neo-collagenesis, lipolytic, draining action, etc.).

Thanks to a clear and intuitive microprocessor control system, a 8.4- inch touch screen colour display which guides and suggests (in Italian) all the simple steps to be performed, the operator will be able to act in absolute freedom and simplicity by personalizing the treatment at 360° according to the subject and the imperfection to be treated.

- Power supply: 230Vac 50/60Hz
- Max absorption: 25W
- Fuses: 2 x T 1.5°
- Max voltage: 50VPP
- Mode of emission: amplitude modulated
- Working frequency: 300Hz - 5000Hz
- Parameter display: LED Colour Touch Screen 8.4"
- Power regulation: intensity displayed in percentage
- Parameter setting: guided by icon, text and image menu
- Controls: all parameters are controlled by microprocessor
- Face handle: Ø 38 mm Body handle Ø 56 mm
- Dimensions L 37cm x H 22cm x D 37cm
- Weight: 7.5 Kg.

GDF: GRAVITATIONAL DIAMOND FINGER

It is now possible to combine the benefits of manual techniques with those of transdermal delivery, for both face and body treatments. The new GDF (Gravitational Diamond Finger) is a professional device with which it is possible to transform one's fingers into effective transdermal delivery handpieces. GDF allows for a triple treatment modality, by selecting the type of transdermal delivery to be performed:

- Infrared (C° mode): they are carrier rays, capable of penetrating deeply, producing heat, thus stimulating the new synthesis of collagen and elastin. The functional substance therefore enters actively into the cell, modulating its metabolism and performing its specific function
- Electrostimulation (BIO mode): through the use of bipolar electrical impulses, a muscle contraction is induced which stimulates venous and lymphatic return, thus leading to tissue re-oxygenation and both superficial and deep lymphatic drainage
- Combined mode: infrared and electrostimulation simultaneously. The thimbles, once worn and activated, release electromagnetic waves which, by shaking the underlying cells, create heat. This input of heat activates skin regeneration processes: the dermal structural fibers (collagen and elastin) are realigned and redistributed, with an immediate tensor effect.

Not only that: by combining specific active functional substances chosen according to the type of blemish to be treated, the generated electromagnetic fields allow their transmission to the deepest layers of the dermis; it is possible to perform a specific manual technique (massage) in order to bring the benefits induced by the chosen maneuver, which is not possible with a classic radiofrequency/electroporation. The peculiarity of the new GDF lies precisely in being able to combine the benefits of manual techniques with those of electrostimulation and infrared, for complete face and body treatments: bio-revitalizing, lifting, illuminating, lipolytic, toning, draining and anti-cellulite treatments.

- Total weight: 330 gr
- Package contents: 1 wristband with command center, 5 thimbles (one specific for the little finger and one specific for the thumb), Italian user manual and Italian CE certification.

DERMAPEN A6

Needling or microneedling is a transdermal delivery treatment for the face and body that is performed with the Dermapen device. Once activated and applied to the specific area to be treated, it creates very small micro-perforations which stimulate the tissue to new collagen and elastin synthesis. In fact, it could be seen as an exclusively restructuring treatment, but it is also used to treat multiple face and body blemishes as these microperforations are exploited as real transdermal delivery channels, thanks to which the functional substances chosen according to the type of blemish to be treated penetrate deeply and perform their specific function.

The Dermapen A6 can be used both in wireless and wired (with cable) mode, has 5 selectable speeds and a needle release adjustment ring from 0.00 mm to 2.50 mm, two interchangeable lithium batteries with 4 hours of autonomy.

Package contents:

- 1 Dermapen A6 device
- 2 lithium batteries
- 1 lithium battery charger
- 1 wired mode connector
- 2 sterile and disposable 12-pin heads
- 1 eu plug
- Italian user manual
- Italian CE certification.

Available boxes of 25-piece sterile and disposable heads for Dermapen A6, 12 or 36 pins.

DERMAPEN HYDRA PEN

The Dermapen Hydra Pen, unlike the A6 model, has sterile and disposable heads to be filled directly with the active substance to be used (maximum 3 ml). During the treatment, the head, in contact with the area to be treated, releases a gradual and constant amount of active substance previously inserted into the tank. In this way, product waste and the use of syringes during the procedure are avoided. Guaranteed delivery: the substance selected and loaded into the special tank leaves the head slipping directly through its microscopic holes. Considering the vertical beating movement of the needles, the active ingredients chosen according to the type of blemish to be treated are actively and gradually conveyed, guaranteeing the achievement of the correct dermal layer and consequently increasing the effectiveness of the treatment. Innovative design and new ergonomics make it easier to use and an internal lithium battery that allows (after a complete two-hour charge cycle) uninterrupted use at the maximum speed of two hours. Predefined and constant needle excursion: the heads are already equipped with fixed length needles (0.25 mm, 0.50 mm face and 1.00 mm body heads available). The absence of the regulating ring on the handpiece prevents accidental changes in depth during the treatment, inadequate ring calibration and excessive wear of the handpiece.

Package contents:

- 1 Hydra Pen device
- 2 protection rings
- 2 sterile and disposable heads of 0.50 mm
- 12 needles
- 1 plug
- Italian user manual
- Italian CE certification.

Available boxes of sterile and disposable heads of 10 pieces of 0.25mm, 0.50mm or 1.00mm of 12 needles.

DERMAPEN HYDRA PEN H3

The Dermapen Hydra Pen H3 represents a true fusion of the previous models, with related innovations:

- the handpiece is lighter, more ergonomic and completely made of steel: this allows the device to be cleaned after each procedure with greater safety and practicality
- operation in both wired (with cable connected to the power) and wireless (without cable) modes; integrated lithium battery with greater efficiency: allows you to carry out, with a 3-hour charging cycle, continuous treatment without using the cable for 5 hours at maximum speed
- 6 selectable speeds for maximum personalization of the treatment
- needle adjustment via regulating ring: adjustable range from 0 to 1mm depending on the areas to be treated
- heads with tank and product viscosity regulator, in order to regulate the flow of the selected cocktail depending on its viscosity, thus preventing very dense cocktails from being unable to flow out of the head.

Package contents:

- 1 Hydra Pen H3 device
- 2 protection rings
- 2 sterile and disposable heads with tank and product viscosity regulator
- 1 EU plug
- User manual in Italian
- Italian CE conformity.

Boxes of sterile and disposable heads of 10 pieces are available for Hydra Pen H3.
